TITLE Population and Family Education Teaching Materials: A Bibliography (Provisional).

INSTITUTION United Nations Educational, Scientific, and Cultural Organization, Bangkok (Thailand). Regional Office for Education in Asia.

PUB DATE May 73

NOTE 74p.; This oversized document contains 37 pages each of which will require two microfiche frames

EDRS PRICE MF-$0.65 HC-$3.29

DESCRIPTORS *Annotated Bibliographies; *Bibliographies; Curriculum Guides; Elementary Education; *Family Life Education; *Family Planning; Higher Education; Kindergarten; *Population Education; Resource Materials; Secondary Education; Sex Education; Teaching Guides; Textbooks

ABSTRACT

This annotated bibliography of population education teaching materials was prepared from documents available in the Population Education Clearninghouse collection of the UNESCO Regional Office for Education in Asia. Most of the materials were published in the 1970's, with the exception of a few which date from the 1960's. In addition to full bibliographic information, the following information is provided for each entry: level of education for which curriculum materials are intended; content of those materials; subjects of formal education into which the materials are to be integrated; whether a bibliography or list of teaching aids is furnished; the country to which the materials refer; and general remarks on the item. Citations are listed alphabetically by author under the following headings; 1) bibliographies; 2) self-teaching guides or textbooks; 3) documents dealing almost wholly with family life and sex education; 4) documents containing population education curriculum materials. Addresses of sources from which to obtain materials are also provided. (Author/RM)

INTRODUCTION

This provisional bibliography concerned with population education teachi
at present available in the Population Education Clearing House collection. As t
the bibliography is far from comprehensive and suggestions as to additions or rev

Scope of Bibliography

Most documents listed contain curriculum materials on population educati
of teachers, but a few documents are included where the emphasis is almost entire
materials are not furnished but rather is methodology of their teaching discussed
and self-teaching guides are also cited.

Definition of Subject

As defined at the Unesco Regional Seminar on Population and Family Life
"population education is an educational programme which provides for a study of t
family, community, nation and world with the purpose of developing in the student
and behaviour towards coping with that situation". To quote Stephen Viederman, "
the process by which the student investigates and explores the nature and meaning
causes of population change and the consequences of these processes, characterist
family, for society and for the world".

However the substance and objectives of population education are describ
and attitudes to be imparted to the student are of two types: an appreciation of
and society of his own actions, and of the consequences for himself of the popula
in his community and nation. The individual learns that he can do something towa
His acts such as having children or moving from place to place have implications,
the family and for the society, which in turn affect the individual. On the deci
of a satisfying quality of life.

INTRODUCTION

oncerned with population education teaching materials is prepared from documents
lucation Clearing House collection. As this is in process of being built up,
ve and suggestions as to additions or revisions would be most welcome.

rriculum materials on population education in its broad sense, for the use
luded where the emphasis is almost entirely on family planning, where curriculum
methodology of their teaching discussed; and several bibliographies, textbooks

l Seminar on Population and Family Life Education held in Bangkok in 1970,
rogramme which provides for a study of the population situation in the
the purpose of developing in the students, rational and responsible attitudes
tuation". To quote Stephen Viederman, "population education is defined as
ates and explores the nature and meaning of population characteristics, the
quences of these processes, characteristics and changes for himself, his

ives of population education are described, it is clear that the knowledge
t are of two types: an appreciation of the consequences for his family
e consequences for himself of the population changes that are occurring
ual learns that he can do something towards transforming his environment.
g from place to place have implications, both social and biological, for
turn affect the individual. On the decisions he makes rests the attainment

It will be noted that most population educators seek to introduce popu
the existing curricula and also that many elements of population education are a
of population education into general education may involve some additions and ch
whole a smooth process which does not necessitate drastic or jarring revisions.

Arrangement of Citations

Citations are listed alphabetically by author under the following broa
B. Self-teaching guides or textbooks; C. Documents dealing almost wholly with
D. Documents containing population education curriculum materials.

Apart from the normal identification of the document by author, title,
sources, where considered useful, are listed separately at the end of this bibli
cover the following aspects: "level of education" for which curriculum material
materials; subjects of formal education into which the materials are to be integ
list of teaching aids is furnished; and the country to which the materials refer
indicated in the "Remarks" column. As the materials are almost invariably in En
where this is not the case.

t most population educators seek to introduce population education materials into
o that many elements of population education are already there. The integration
eneral education may involve some additions and changes of stress but is on the
oes not necessitate drastic or jarring revisions.

alphabetically by author under the following broad headings: A. Bibliographies;
xtbooks; C. Documents dealing almost wholly with family life and sex education;
ation education curriculum materials.

identification of the document by author, title, imprint, etc., addresses of
l, are listed separately at the end of this bibliography. Vertical column headings
"level of education" for which curriculum materials are intended; "content" of those
ducation into which the materials are to be integrated; whether a bibliography or
hed; and the country to which the materials refer. Other noteworthy points are
mn. As the materials are almost invariably in English, language is only mentioned

-	-	-	General	This paper deals with objectives of population education, methodology to be used and areas to be selected or stressed in gaining these objectives. Major emphasis is laid on structuring demographic and economic content of population education so as to attain transfer of learning through problem solving and discovery learning. Information is arranged for convenience under four headings, which are interwoven and linked by a common concept, "control of environment" by the individual's actions. These headings are: information transmission and transfer of learning; discovery learning and problem solving; moral learning; activity and experimental reinforcement.
Chemistry or other suitable course	-	-	General	Conceptual scheme presented in general outline form and in expanded form at three school levels.

Part I provides resource information to help plan population education programme; Part II offers suggestions for integrating population education into school subjects and outline of content; and Part III includes suggestions for teaching of one selected topic.
Where appropriate, Geography.	Yes	Yes	India/ general	Separate sections (with separate bibliographies and lists of teaching aids) are provided on family life education and population education. A small section deals with a training programme for teachers, describes methodology and sets out a course outline for teachers in service. Vocabulary on human reproduction is given in English, Hindi, Marathi and Gujarati.

Subjects into which integrated	Bibliogr.	List of teaching aids	Country	Remarks
Social Studies, Humanities, Science.	Yes	-	General	The study is rather concerned with methodology of teaching than actual content of teaching materials. Three approaches to population education are admitted and examined: "programme infusion"; "unit of study"; and "separate course". A schematic model of a population education curriculum design attempts to organize the chief points at which curriculum decisions are made on the emphasis of the use of audio-visual aids, the considerations which apply to each relationship which should exist among these points and the criteria.
Environmental Studies	Yes	-	US/ general	This paper presents proposed outline of a six-week unit on population to be included in a full year "Environmental Studies" course for high school sophomores. Results are set out of a survey of types of population education programmes being offered in Massachussetts (covering responses from 18 schools). Ideas and methods used in these programmes are included in the unit outline.
